When work at my internship this past summer was slow, I'd look at similar career data, so I'd say that the majority of the data I collected in this exercise wasn't surprising to me, since I was already familiar with a lot of it.

Ranking of jobs:

- Supply Chain Logistician
- Ad Promo/Marketing Manager
- Public Relations Manager
- Data Scientist
- Web Developer/Digital Design
- Television/Sports Producer
- Probation Officer
- Project Management Specialist
- Human Resources Specialist
- Operations Research Analyst

I ranked these positions in the order I believe will contribute most to my overall happiness. My ideal job isn't solely finance-focused. Instead, I'm looking for a role that offers a hybrid work environment, some flexibility to move around rather than being at a desk all day, and opportunities for creativity, planning, organizing, and delegating.
